Let's Start!

Workers need a lively atmosphere at night.

Learning Outcome

Accurately use information about people's backgrounds in a wider variety of communicative situations.

Ask your partner:

- Would you want to work a night shift? Why or why not?
- What kind of jobs require people to work overnight?

Can Do Statements

- I can talk about jobs, work, and staying healthy.
- I can talk about my attitudes toward an action.
- I can talk about what I should, ought to, had better, or am supposed to do.

Let's Explore!

Let's read about working around the clock. What is recommended?

Instructions: Read the text aloud.

There are more and more jobs where people are supposed to stay awake around the clock. In many industries using high-tech equipment, experts must stay alert during night shifts. The lives of others may depend on them. Often, people using high-tech equipment ought to watch computers non-stop in order to catch any irregularity or to prevent a disaster.

They had better not fall asleep, even for a second. If these technicians happen to drop off to sleep at a crucial moment, irreparable damage may be done.

In order for people to stay awake around the clock, they should have the proper environment. We know the conditions that most people need to have to fall asleep. The average person needs to have low lights, quiet, and a comfortable temperature. What kind of environment do we need if we have to stay awake for longer than average periods?

Scientists have conducted experiments that involve designing rooms where people are less likely to fall asleep. The no-sleeping room should have good lighting, sufficient background noise, visual stimuli, and even interesting smells.

The typical carpeted, barely lit computer rooms that are in use in most companies ought to be redesigned. Workers don't need a relaxing atmosphere at night; they need a lively one.

Let's Practice!

John talks about shift work.

Instructions: Circle the correct word to complete the sentence.

1. There are more and more jobs where people are supposed to stay/have/fall awake around the clock.
2. People using high-tech equipment ought to stay/be/watch computers non-stop in order to catch any irregularity or to prevent a disaster.
3. They had better not have/fall/be asleep, even for a second.
4. In order for people to stay awake around the clock, they should have/be/watch the proper environment.
5. The work atmosphere should have/fall/be lively at night.

Let's Practice!

Michael talks about ways to keep workers awake.

Instructions: Organize the mystery sentence.

1. know / fall / to / have / asleep / people / to / the / most / conditions / need / We / that / .

2. people / stay / experiments / awake / conducted / involve / rooms / have / Scientists / can / designing / longer / where / . / that

3. . / Workers / environment / asleep / a / in / to / fall / likely / less / lively / are

4. risk / equipment / People / falling / the / using / on / cannot / . / job / high-tech / asleep

5. . / the / employers / work / redesigning / considering / are / Many / space

Extension Activity

Write a letter to your boss.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Imagine that you work a night shift and you must remain alert.
- With a partner, make a list of things that you think would help you stay alert.
- On your own, write a letter to your boss asking for some changes at your workplace.
- Exchange letters with your partner and give your partner some feedback.

Self-Assessment

Yes

No

I talk about jobs, work and staying healthy.

☐ ☐

I talk about what I should, ought to, had better or am supposed to do.

☐ ☐

I talk about my attitudes toward an action.

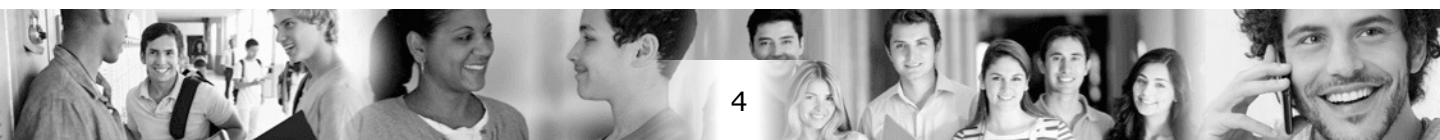

☐ ☐

I write a letter asking for changes at work.

☐ ☐

Target Words

- **around the clock** (expression): all day and night
e.g. There are more and more jobs where people are supposed to stay awake around the clock.
- **high-tech** (adjective): using or requiring high technology
e.g. In many industries using high-tech equipment, operators must stay awake.
- **irregularity** (noun): the state of being irregular
e.g. Often, people using high-tech equipment ought to watch computers non-stop in order to catch any irregularity or to prevent a disaster.
- **crucial** (adjective): very important
e.g. If technicians fall asleep at a crucial moment, damage can be done.
- **irreparable** (adjective): impossible to repair
e.g. Irreparable damage can be done if technicians fall asleep.
- **to drop off** (verb): to fall asleep
e.g. If these technicians happen to drop off to sleep at an important moment, damage may be done.
- **average** (adjective): usual or ordinary standard, level, or quantity
e.g. What kind of environment do we need if we have to stay awake for longer than average periods?
- **stimuli** (noun): plural of stimulus (a thing that produces activity)
e.g. The no-sleeping room should have good lighting, sufficient background noise, visual stimuli, and even interesting smells.
- **carpeted** (adjective): covered with carpet
e.g. The typical carpeted, barely lit computer rooms that are in use in most companies ought to be redesigned.

Learning Points

Gerunds and Infinitives

A **gerund** is a verb ending with *-ing* (*doing*).
An **infinitive** is *to* + verb (*to do*).

There are rules about which verbs you can use with gerunds and which verbs you can use with infinitives.

Verbs commonly followed by a gerund:

Verbs that express **likes/dislikes**:

- like
- love
- enjoy
- dislike
- hate

Example:

Tom **disliked confronting** people about money.

The verbs *like/love/hate* can also be followed by an infinitive.

Some other verbs that are followed by a gerund:

- anticipate
- consider
- delay
- complete
- involve
- suggest
- risk

You use gerunds after prepositions.

Example:

We know the conditions that most people need **for falling** asleep.

These are some verbs that are followed by an infinitive:

- hope
- proceed
- seem
- need
- happen

Learning Points

Example:

*The average person **needs** to have low lights.*

You use infinitives after adjectives.

Example:

*He was **determined to ask** his boss, Mr. Draper, for a pay bump.*

Examples:

- *If these technicians happen to drop off to sleep at a crucial moment, irreparable damage may be done.*
- *We know the conditions that most people need for falling asleep.*
- *The average person needs to have low lights, quiet, and a comfortable temperature.*
- *Scientists have conducted experiments that involve designing rooms.*
- *People are less likely to fall asleep.*

Learning Points

Using Modals to Add Meaning

When you want to add the meaning of advice, strong advice, necessity and obligation, you can use the modal verbs: *should*, *had better*, *ought to* and *supposed to*.

When you add **not** to a modal, it has a negative meaning.

Look at the following chart with examples of each modal. Practice reading the examples aloud.

Modal	Negative Form	Meaning	Example
<i>Should</i>	should + not	Advice	<i>In order for people to stay awake around the clock, they should have the proper environment.</i>
<i>Ought to</i>	ought + not + to	Advice	<i>Often, people using high-tech equipment ought to watch computers non-stop in order to catch any irregularity.</i>
<i>Had better</i>	had better + not	Strong Advice (Necessity)	<i>They had better not fall asleep, even for a second. They'd better not fall asleep, even for a second.</i>
<i>Supposed to</i>	not + supposed to	Obligation	<i>There are more and more jobs where people are supposed to stay awake around the clock.</i>

Notice the reduction of *had better*. In speaking, it is normally reduced to *'d better*.
