Let's Start!

What can we do to help our overnight workers?

Learning Outcome

Accurately use information about people's backgrounds in a wider variety of communicative situations.

Ask your partner:

- What do you think the most stressful jobs are? Why?
- How do you keep a work/school life balance?

Can Do Statements

- I can talk about jobs, work, and staying healthy.
- I can talk about my attitudes toward an action.
- I can talk about what I should, ought to, had better, or am supposed to do.

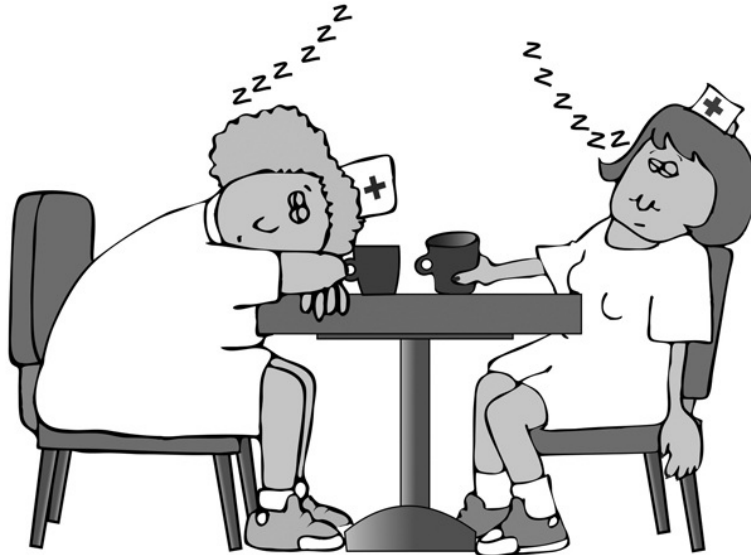

Let's Explore!

What are the health risks to people who work **overnight***? How can we help them?

* "Overnight" means from the evening to the morning.

Instructions: Read the text aloud.

In a busy, active society like ours, many services are made available 24 hours a day. Nurses, doctors, factory workers, cashiers in 24-hour stores, all ought to spend long nights each month working while most of the city sleeps. What many people do not realize is that working at night could do more than simply make you tired.

A research study was recently done on hospital nurses in the U.S. The nurses in the study were supposed to work several nights every month in addition to their regular day and evening work. What was discovered was that these nurses had a 70 percent higher chance of having a heart attack than people who work regular hours.

The reason for the increase in the risk of heart attack has to do with stress hormones. When people work at the time they should be resting, the body produces a chemical that proceeds to make them feel stress. In time, these chemicals, called stress hormones, can damage the heart.

It may be necessary to work nights in our society, but what about the people who risk their health serving us? We had better find a way to lower the health risks but still enjoy our night-time services.

Let's Practice!

What are the effects of long working hours on our health?

Instructions: Circle the incorrect words in the sentence. Write the correct words above.

1. Nurses, doctors, factory workers, cashiers in 24-hour stores, all ought to spends long nights each month working while most of the city sleeps.
2. The nurses in the study were supposed to working several nights every month in addition to their regular day and evening work.
3. When people work at the time they should being resting, the body produces a chemical that proceeds to make them feel stress.
4. We had better found a way to lower the health risks but still enjoy our night-time activities.
5. People should been aware that too much work can be dangerous to their health.

Let's Practice!

John talks about the effects of long work hours on health.

Instructions: Choose the words from the Word Bank to correctly complete the sentences.

1. What was discovered was that these nurses had a 70 percent higher _____ a heart attack than people who work regular hours.
2. We _____ finding a way to lower the health risks but still enjoy our night-time services.
3. It may _____ nights in our society, but what about the people serving us?
4. The body produces a chemical that _____ them feel stress.
5. Improving health _____ the production of stress hormones.

Word Bank

- involves reducing
- chance of having
- proceeds to make
- need to consider
- be necessary to work

Extension Activity

Rank jobs from most to least stressful.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- On the internet, read about these jobs: firefighter, hospital nurse, fisherman, taxi driver, high school teacher.
- Make some notes on the responsibilities of people who do these jobs.
- Put the jobs in order from most stressful (1) to least stressful (5). Be prepared to explain your choices.
- With a partner, compare lists and discuss any differences.

Self-Assessment

Yes **No**

I talk about jobs, work and staying healthy.

☐ ☐

I talk about my attitudes toward an action.

☐ ☐

I talk about what I should, ought to, had better, or am supposed to do.

☐ ☐

I talk about stressful jobs and decide which are the most stressful.

☐ ☐

Target Words

- active** (adjective): having energetic activity
e.g. In a busy, active society like ours, we are awake day and night.
- service** (noun): a system supplying a public need
e.g. Many services are available day and night.
- 24 hours a day** (expression): all day; around the clock
e.g. In a busy, active society like ours, many services are made available 24 hours a day.
- 24-hour** (adjective): open or available all day and all night
e.g. Nurses, doctors, factory workers, cashiers in 24-hour stores work while the rest of us sleep.
- heart attack** (noun): a sudden, sometimes serious, malfunction of a part of the heart muscle
e.g. What was discovered was that these nurses had a 70 percent higher chance of having a heart attack than people who work regular hours.
- hormone** (noun): a substance produced in tissue fluids such as blood to stimulate specific cells or tissues
e.g. The reason for the increase in the risk of heart attack has to do with stress hormones.

Learning Points

Using Modals to Add Meaning

You use modal verbs to add meaning to the main verb of a sentence. They help to provide a clearer picture or context to the reader or listener.

Some examples of modals are: *should*, *had better*, *ought to* and *supposed to*. This group of modals add the meanings of advice, obligation or necessity.

They come before the main verb of the sentence.

Look at the following chart with examples of each modal. Practice reading the examples aloud.

Modal	Meaning	Example
<i>Should</i>	Advice	<i>When people work at the time they should be resting, the body produces a chemical that proceeds to make them feel stress.</i>
<i>Ought to</i>	Advice	<i>Nurses, doctors, factory workers, all ought to spend long nights each month working.</i>
<i>Had better</i>	Strong Advice (Necessity)	<i>We had better find a way to lower the health risks but still enjoy our night-time services.</i>
<i>Supposed to</i>	Obligation	<i>The nurses in the study were supposed to work several nights every month in addition to their regular day.</i>

Notice the reduction of *had better*. In speaking, it is normally reduced to *'d better*.

Gerunds and Infinitives

A **gerund** is a verb ending with *-ing* (*doing*).

An **infinitive** is *to* + verb (*to do*).

There are rules about which verbs you can use with gerunds and which verbs you can use with infinitives.

Verbs commonly followed by a gerund:

Verbs that express **likes/dislikes**:

- like
- love

Learning Points

- enjoy
- dislike
- hate

Example: Tom **disliked confronting** people about money.

The verbs *like/love/hate* can also be followed by an infinitive.

Some other verbs that are followed by a gerund:

- anticipate
- consider
- delay
- complete
- involve
- suggest
- risk

You use gerunds after prepositions:

*These nurses had a 70 percent higher chance **of having** a heart attack.*

These are some verbs that are followed by an infinitive:

- hope
- proceed
- seem
- need
- happen

Example: *The body produces a chemical that **proceeds to make** them feel stress.*

You use infinitives after adjectives.

Example: *It may be **necessary to work** nights in our society.*

Examples:

- *What was discovered was that these nurses had a 70 percent higher chance of having a heart attack than people who work regular hours.*
- *When people work at the time they should be resting, the body produces a chemical that proceeds to make them feel stress.*
- *It may be necessary to work nights in our society, but what about the people who risk their health serving us?*
