Let's Start!

What are the pros and cons of working while at school?

Learning Outcome

Accurately use information about people's backgrounds in a wider variety of communicative situations.

Ask your partner:

- Did you ever have a job while you were in high school? Why or why not?
- How do you feel about teenagers working? Do you think it's good for their future?

Can Do Statements

- I can talk about jobs, work, manners and customs.
- I can talk about what I should, ought to, had better, or am supposed to do.
- I can talk about future action.

Let's Explore!

How do you feel about **teenagers*** working?

* "Teenagers" are people aged 13 to 19 years old.

Instructions: Read the text aloud.

Working part-time during school has become common with many American high school students. The advantages are clear. Teens make extra spending money, get valuable work experience, learn to manage their time, and meet new people. But what effect does it have on their grades?

Recent research suggests that working part-time can have a negative effect on school performance. Students under 18 that work more than 20 hours a week may be less likely to complete school than those who don't. Teens ought to have time for other activities and for family and friends.

"Clearly, there are both advantages and disadvantages to combining work and school," said the parent of one working teen. "Interviewing for different positions and working for an employer has been good for my daughter. But there is supposed to be a balance between study, work, and other activities. I want her to be successful in every aspect of her life."

Others argue that the type of job a teenager chooses is important. "Teenagers should apply for positions that shall give them future career opportunities," said one expert. "That way, they learn to do things that will help them later. They get skills and qualifications that will lead them to an interesting, high-paying job in the future."

There had better be longer-term research completed if we are to gain a better understanding of the impact of work on teenagers' overall life performance.

Let's Practice!

What will the future bring for young people?

Instructions: Circle the correct word to complete the sentence.

- Recent research suggests that working part-time **will have / will / will has** a negative effect on school performance.
- I hope she **been / shall been / shall be** successful in every aspect of her life.
- Teenagers should apply for positions that shall **gave / gives / give** them future career opportunities.
- That way, they learn to do things that **helps / will helped / will help** them later.
- They get skills and qualifications that **would lead / lead / will lead** them to an interesting, high-paying job in the future.

Extension Activity

Do a survey about high school students and work.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Find out how many other students work while studying and how they feel about it.
- Write some questions to ask other students about their opinions about the advantages and disadvantages of having a part-time job.
- Summarize your findings.
- Present your information to your group or class.

Self-Assessment

Yes **No**

I talk about jobs, work, manners and customs.

☐ ☐

I talk about what I should, ought to, had better, or am supposed to do.

☐ ☐

I talk about future action.

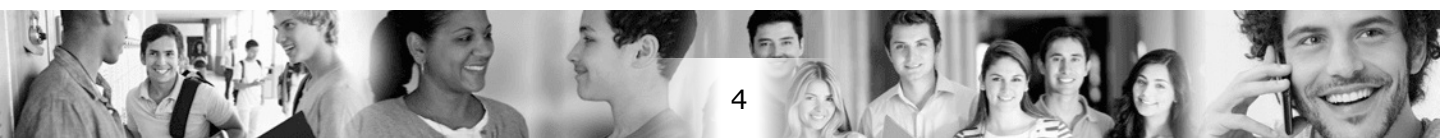

☐ ☐

I survey other students and present information to a group.

☐ ☐

Target Words

- **spending money** (noun): money not required for essentials
e.g. Teens make extra spending money, get valuable work experience, learn to manage their time, and meet new people.
- **grade** (noun): mark received in school
e.g. But what effect does work have on their grades?
- **performance** (noun): how well a person, machine, etc. does a piece of work or an activity
e.g. Working part-time can have a negative effect on school performance.
- **to combine** (verb): to join together
e.g. There are both advantages and disadvantages to combining work and school.
- **balance** (noun): a state where things are of equal importance or force
e.g. There is supposed to be a balance between study, work, and other activities.
- **aspect** (noun): one part
e.g. I want her to be successful in every aspect of her life.
- **qualification** (noun): the skills and experience required for a job or position
e.g. They get skills and qualifications that will lead them to an interesting job in the future.
- **high-paying** (adjective): having a high salary
e.g. You need skills and qualifications to get a high-paying job.

Learning Points

Using Modals to Add Meaning

Modals are called "helper verbs" because you use them to help specify meaning of the main verb of a sentence. Modal verbs can add the meanings of advice, strong advice and obligation (among other uses).

Some examples of modals are: *should*, *had better*, *ought to* and *supposed to*.

The structure of statement or question with a modal verb is:

Subject + modal + verb

Question word + modal + subject + main verb

Look at the following chart with examples of each modal.

Modal	Meaning	Example
<i>Should</i>	Advice	Teenagers should apply for positions that shall give them future career opportunities.
<i>Ought to</i>	Advice	Teens ought to have time for other activities and for family and friends.
<i>Had better</i>	Strong Advice (Necessity)	There had better be longer-term research completed. There 'd better be longer-term research completed.
<i>Supposed to</i>	Obligation	But there is supposed to be a balance between study, work, and other activities.

Notice the reduction of *had better*. In speaking, it is normally reduced to *'d better*.

Should and *ought to* have the same meaning, but *should* is more common in American English.

Learning Points

Talking About the Future Using *Will* and *Shall*

You use *will* and *shall* to give information about the future or to make predictions (talk about what we think or guess) about the future.

This is the form you use:

subject + *will/shall* + verb

Example:

It will be cold tomorrow.

He shall call me next week.

Speakers of North American English rarely use *shall* in this way, as it sounds too formal in conversation. It is sometimes used in writing.

Examples:

- *Teenagers should apply for positions that shall give them future career opportunities.*
- *That way, they learn to do things that will help them later.*
- *They get skills and qualifications that will lead them to an interesting, high-paying job in the future.*
